

SOFTWARE DEFINED DATA MIGRATION

No matter the record size, downtime constraints, data mapping complexity, or current application/platform usage, the Candoris team of experts offer a demonstrated track record of successful data migrations.

“ Flawless data migration could be the #1 most crucial element to your organization’s success. ”

DATA MIGRATION INCLUSIONS

- ANALYSIS of current data model 
- MAPPING of new data model 
- TRANSFORMING data to new model 
- REVIEWING results with customer 
- ASSISTING with data analysis, issue resolution, multiple data loads, & production data load 

QUESTIONS TO ASK:

- What is my most important data? 
- What kind of data do I need that I don't currently have?
- Where is my data?
- Can I regularly access my data?
- What data elements are most important to me?
- Is there any data that will be irrelevant in the new system?

THE CANDORIS ADVANTAGE

METHODOLOGY

Our team places highest importance on accurate CRM data, recognizing that migration is a project cornerstone. We utilize a software driven data migration methodology, scripting data to enable migrating multiple times for multiple instances, delivering customers valuable insight throughout reveals, user testing, and training.

PHILOSOPHY

Our team views data migration as an interactive, ongoing exercise, and works closely with customers throughout the entire process. We use a fixed price model to establish project parameters and avoid cost surprises.

PROVEN EXPERIENCE

We built proprietary software that drives our custom migration methodology, enabling us to easily perform repeatable data migrations for small businesses through large organizations.

Candoris uses a fixed price model to establish project parameters and avoid cost surprises.
